

### **Ruby Air Operated Diaphragm Pumps**

## **Ruby 050**

Construction materials: Aluminum - AISI 316

New pump line with a brand new designing that offers reinforced pumping potentials. The updated designing provides even bigger performance provided with economy.

## **Benefits**

- Optimal performance
- · Economical air consumption, ecological designing
- High efficiency for pressure/capacity
- Oil free operation
- No freezing
- · New air valve designing, fully controlled air passing
- Easy disassembling and re-assembling
- · New generation diaphragms with embodied inner-outer piston

- New generation PTFE diaphragms of embodied type for long-life operation (compound)
- Advanced quality Full capacity PTFE-A diaphragms for high chemical and mechanical applications
- Potential to be submersible (on request)
- · Possibility to be used in dirty environments due to their closed designing
- · Easy manifold reverse
- Automatic suction

## Ruby Innovative oil free air valve

The heart of the Ruby pump is our innovative, new design air valve. In respect for New Era demands, to create and offer High Quality product, with high interest for the environment and it's protection, the Air Valve of the Ruby Diaphragm Pumps has been created to offer:

- Oil free operation
- Low need for maintenance
- Not affected by minor contamination of compressed air
- Significant energy saving
- Non freezing operation
- External environment operation
- No dead centre
- Long life
- Reliability

## Advance unified diaphragms featuring:

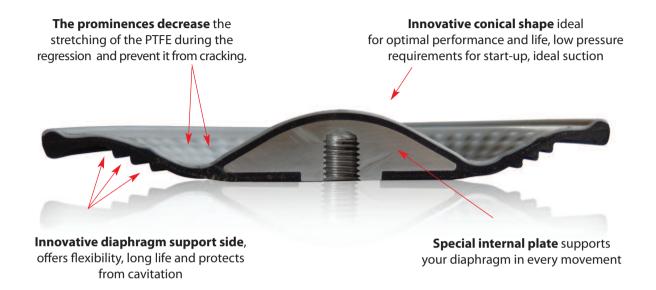

- Easy installation and maintenance
- Excellent service life
- Inventory cost reduction
- Improved performance
- Greater displacement per cycle
- No center hole, elimination of potential leak paths.
- There is no need for the main axis to be insured
- They can be screwed and unscrewed without the use of tools
